NEW GEN REVERSIBLE HARNESS

# BOUNDLESS

## Reversibility Reimagined

The BOUNDLESS revolutionises the category of reversible harnesses: a reversible harness that doesn't need to be turned inside out. It is an intelligent harness-backpack system with a novel reversing function that combines and recombines proven components from our various high-end harnesses. The connected backpack, with a removable back protector, is one of several protective elements and integrates as part of the hybrid protector system when unpacked at the bottom. The compactness is evident both in its packed size and in the feel during flight: the sleek design with adapted seat board ensures high comfort on both short and long flights.

# ADVANCE

## Pioneering spirit and Swiss precision Our story

Enable our ideas to fly, that's what we do. For more than 30 years, ADVANCE have kept the needs and wishes of our pilots at the forefront. With Swiss precision we refine model after model. Highest quality and absolute reliability have our top priority, in the air and in our customer service. So from pioneers we have become perfectionists, and a leading worldwide comprehensive service provider.

### UNPACKING - NO REVERSING

After just three simple actions the BOUNDLESS is ready to go. Open the rucksack, arrange the harness in front of it, stow the rucksack in its pocket under the seatboard, That's it. This BOUNDLESS system avoids turning anything inside out, and managing it is very much simpler than preparing a traditional reversible harness.

## TWIN-FIT Protector

### NEW TWIN-FIT PROTECTOR

The BOUNDLESS protector system has three parts. There's an air-foam element (Part 1), a foam element (Part 2) and the rucksack with its built-in back foam (Part 3). Advantages: an obviously more compact volume for the complete harness system, and more storage space in the back pocket. If preferred, the rucksack foam can be taken out and permanently stowed in the protector compartment.

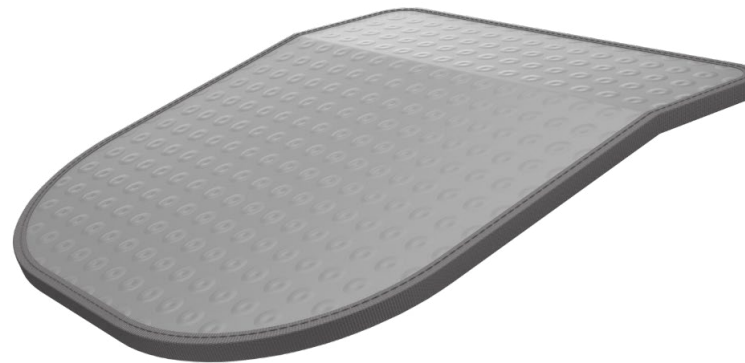

# BOUNDLESS

## Seatboard

### SLIM HONEYCOMB SEATBOARD

The thin polypropylene seatboard provides a comfortable connection between you and the harness. It gives you helpful glider feedback in flight, and after takeoff lets you slip easily back into the flying position. Before landing it again helps you slide forward for a safe upright landing. The BOUNDLESS extends our product range, and alongside the PROGRESS 3 a reversible harness with seat board is now available.

# BOUNDLESS

## Backpack

The backpack is part of the comprehensive BOUNDLESS delivery scope and based on the LIGHTPACK DLS rucksack. The backpack is available and exchangeable in sizes 78, 83 and 90 litres.

### Standard Delivery

Size S: 78 litres

Size M: 83 litres

Size L: 90 litres

# BOUNDLESS

## Unbound Flexibility

### MULTIFUNCTION BACKPACK

If you'd like a different size backpack, or need to replace a damaged example, the backpack is easily separated from the harness by its attachment zip. If you want to store the backpack in the harness back pocket it is essential that its foam is first removed then stowed in the protector compartment.

# BOUNDLESS

## R&D Insights

"THE BOUNDLESS OPENS UP A NEW CATEGORY OF REVERSIBLE HARNESSES WITH THE NEW BACKPACK SYSTEM AND ALLOWS FOR VERSATILE USE WITH HIGH FLYING COMFORT."

Bruno Häubi  
ADVANCE Harness-Developer

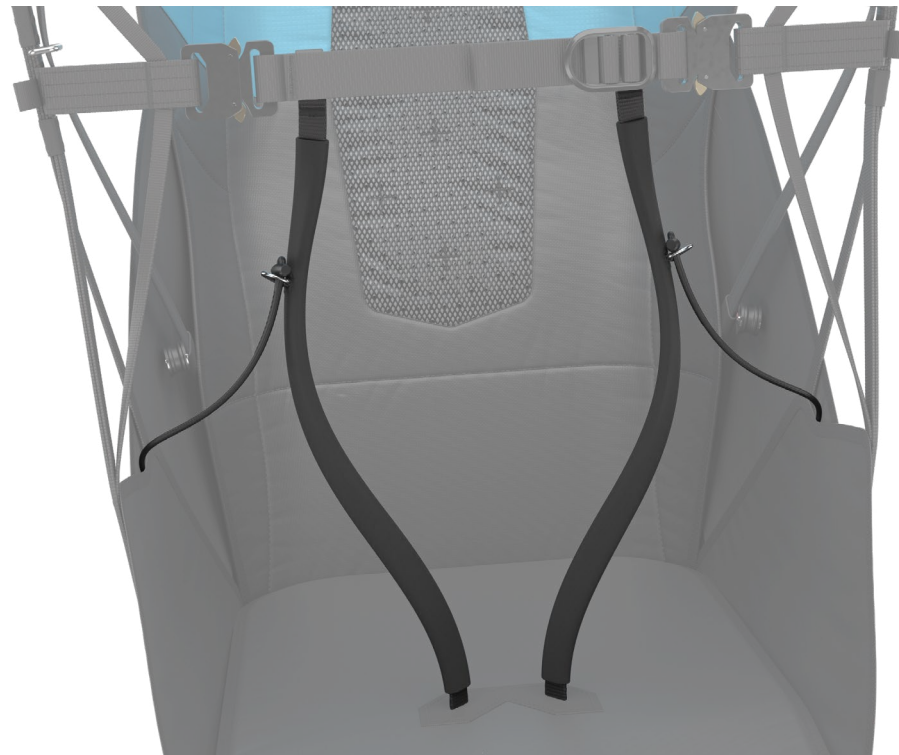

# BOUNDLESS

## Groundhandling Assistance

### LEG STRAP POSITION HOLDER

For comfortable ground handling, the BOUNDLESS now has two elastic cords that keep the leg straps in a comfortable position. The cords are stored in a pocket on the side and can be connected to the leg straps with bullet toggles if required (e.g. for ground handling and soaring sessions with touch and go).

# BOUNDLESS

## Delivering Convenience

### SPEED SYSTEM ALREADY INSTALLED

BOUNDLESS is delivered with a carbon speedbar system. The speed system runs through the harness via its easy-rolling ball bearing pulleys, and is already installed at delivery.

# BOUNDLESS

Footrest compatible

## OPTIONAL FOOTREST

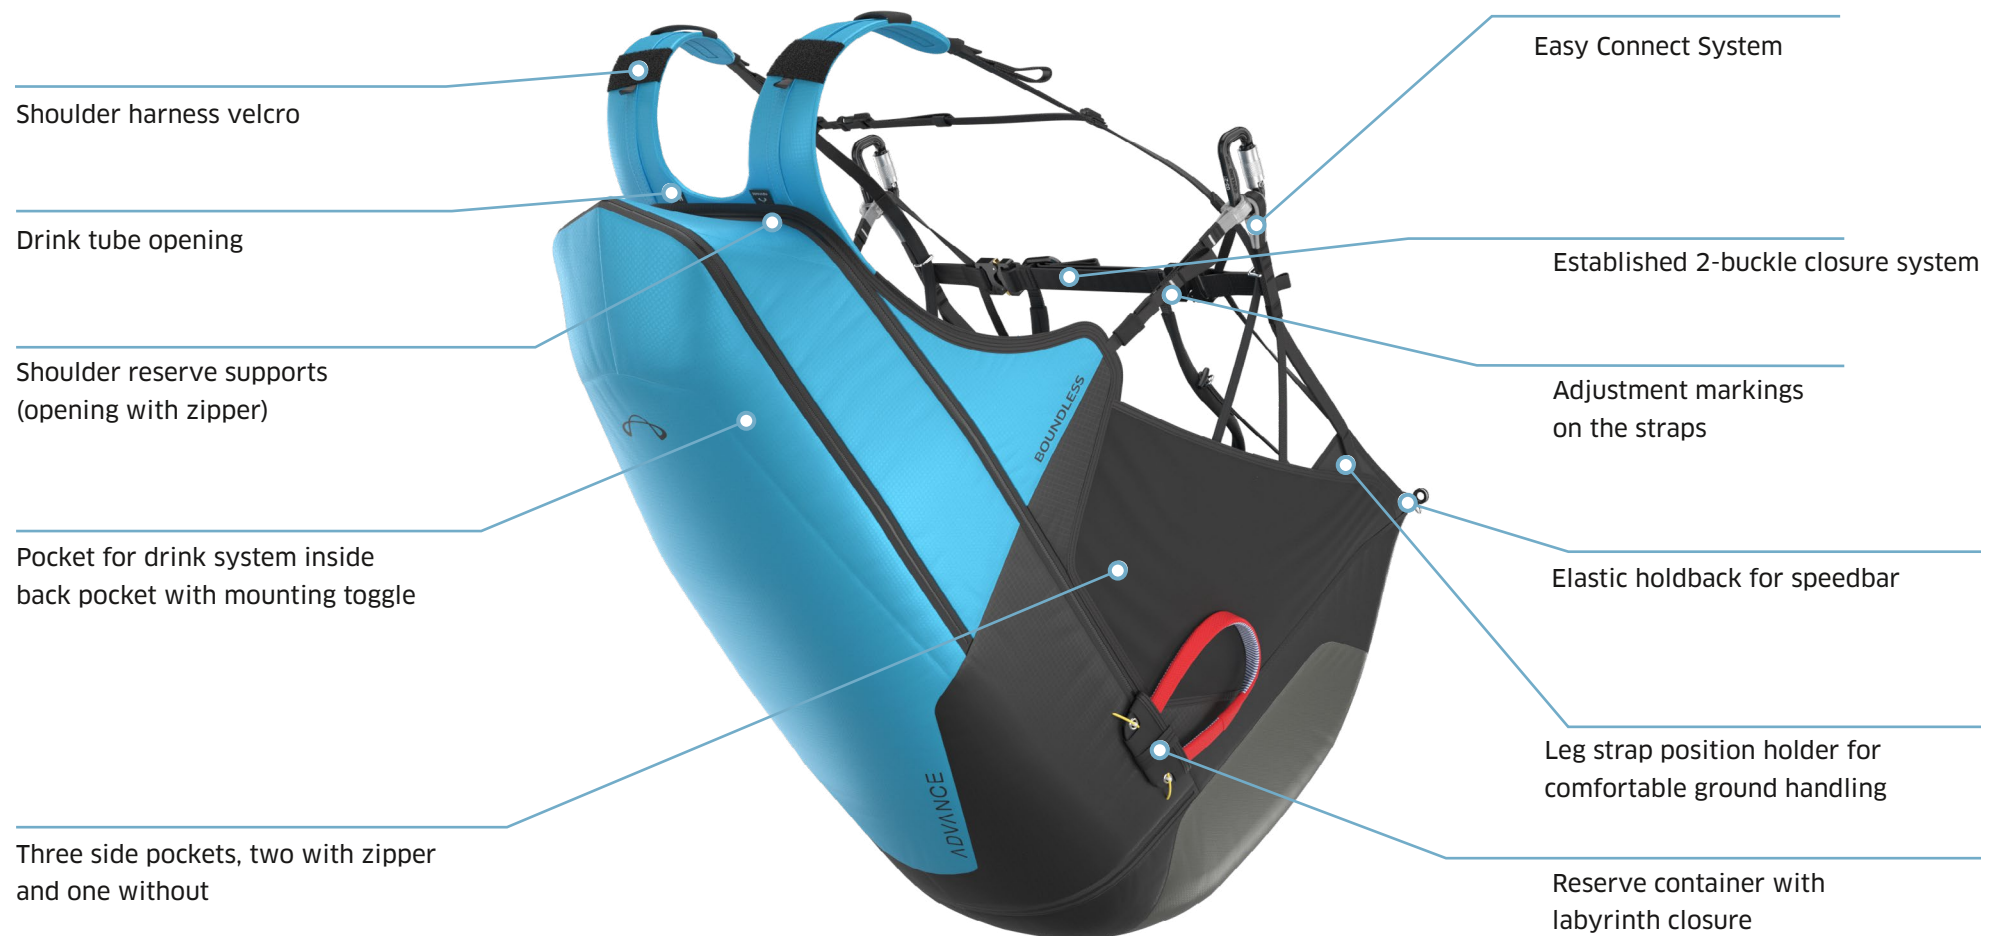

A BOUNDLESS footrest/stirrup is available as an optional extra. The footrest is included in the harness certification, and comes with a speedbar tensioner cord.
