DHV TESTREPORT EN 926-2:2013+A1:2021

	J

4 L

Type test reference no Holder of certification	Skywalk Tequila 6 95 DHV GS-01-2833-23 Skywalk GmbH & Co. KG	
	Skywalk GmbH & Co. KG	
Winch towing Number of seats min / max	Yes 1 / 1	
Accelerator Trimmers		
	BEHAVIOUR AT MIN WEIGHT IN FLIGHT (75KG)	BEHAVIOUR AT MAX WEIGHT IN FLIGHT (95KG)
Test pilots		
	Josef Bauer No release	Harald Buntz No release
Inflation/take-off		Smooth, easy and constant rising
Special take off technique required	No	No
Special landing technique required		No
Speeds in straight flight Trim speed more than 30 km/h		A Yes
Speed range using the controls larger than 10 km/h Minimum speed	Yes Less than 25 km/h	Yes Less than 25 km/h
		Α
Symmetric control pressure Symmetric control travel	-	Increasing Greater than 60 cm
Dive forward angle on exit	Dive forward less than 30°	A Dive forward less than 30°
Collapse occurs Pitch stability operating controls during		No
accelerated flight Collapse occurs		A No
Roll stability and damping Oscillations		A Reducing
		A
Tendency to return to straight flight	·	Spontaneous exit
	Immediate reduction of rate of turn Spontaneous exit (g force decreasing, rate of	
	turn decreasing)	rate of turn decreasing) Less than 720°, spontaneous recove
·	A Rocking back less than 45°	A Rocking back less than 45°
Recovery Dive forward angle on exit	Spontaneous in less than 3 s Dive forward 0° to 30°	Spontaneous in less than 3 s Dive forward 0° to 30°
Change of course Cascade occurs Folding lines used	No	Keeping course No no
<u>Jnaccelerated collapse (at least 50 % chord)</u>	·	A Rocking back less than 45°
Recovery Dive forward angle on exit		Rocking back less than 45° Spontaneous in less than 3 s Dive forward 0° to 30°
Change of course Cascade occurs Folding lines used	Keeping course No	Keeping course No no
		B
-	Rocking back less than 45° Spontaneous in less than 3 s	Rocking back less than 45° Spontaneous in less than 3 s Dive forward 30° to 60°
Change of course Cascade occurs	Entering a turn of less than 90° No	Entering a turn of less than 90° No
Folding lines used Exiting deep stall (parachutal stall)		no
Deep stall achieved Recovery	Spontaneous in less than 3 s	Yes Spontaneous in less than 3 s
Dive forward angle on exit Change of course Cascade occurs	Changing course less than 45°	Dive forward 0° to 30° Changing course less than 45° No
		Α
Recovery Cascade occurs	Spontaneous in less than 3 s No	Spontaneous in less than 3 s No
Recovery from a developed full stall Dive forward angle on exit		A Dive forward 0° to 30°
Cascade occurs (other than collapses)		No collapse No Less than 45°
Kocking back		
	Most lines tight	Most lines tight
Line tension Small asymmetric collapse Change of course until re-inflation	Most lines tight A Less than 90°	Most lines tight A Less than 90°
Line tension	Most lines tight A Less than 90° Dive or roll angle 0° to 15° Spontaneous re-inflation	Most lines tight
Line tension Small asymmetric collapse Change of course until re-inflation Maximum dive forward or roll angle Re-inflation behaviour Total change of course Collapse on the opposite side occurs	Most lines tight A Less than 90° Dive or roll angle 0° to 15° Spontaneous re-inflation Less than 360° No (or only a small number of collapsed cells with a spontaneous re inflation)	Most lines tight A Less than 90° Dive or roll angle 0° to 15° Spontaneous re-inflation Less than 360° No (or only a small number of
Line tension <u>Small asymmetric collapse</u> Change of course until re-inflation Maximum dive forward or roll angle Re-inflation behaviour Total change of course Collapse on the opposite side occurs Twist occurs Cascade occurs	Most lines tight A Less than 90° Dive or roll angle 0° to 15° Spontaneous re-inflation Less than 360° No (or only a small number of collapsed cells with a spontaneous re inflation) No No	Most lines tight A Less than 90° Dive or roll angle 0° to 15° Spontaneous re-inflation Less than 360° No (or only a small number of collapsed cells with a spontaneous re-inflation
Line tension Small asymmetric collapse Change of course until re-inflation Maximum dive forward or roll angle Re-inflation behaviour Total change of course Collapse on the opposite side occurs Twist occurs Cascade occurs Folding lines used	Most lines tight A Less than 90° Dive or roll angle 0° to 15° Spontaneous re-inflation Less than 360° No (or only a small number of collapsed cells with a spontaneous re inflation) No No No No	Most lines tight A Less than 90° Dive or roll angle 0° to 15° Spontaneous re-inflation Less than 360° No (or only a small number of collapsed cells with a spontaneous reinflation) No No No No
Line tension Small asymmetric collapse Change of course until re-inflation Maximum dive forward or roll angle Re-inflation behaviour Total change of course Collapse on the opposite side occurs Collapse on the opposite side occurs Cascade occurs Folding lines used arge asymmetric collapse Change of course until re-inflation Maximum dive forward or roll angle	Most lines tight A Less than 90° Dive or roll angle 0° to 15° Spontaneous re-inflation Less than 360° No (or only a small number of collapsed cells with a spontaneous re inflation) No No no 90° to 180° Dive or roll angle 15° to 45°	Most lines tight A Less than 90° Dive or roll angle 0° to 15° Spontaneous re-inflation Less than 360° No (or only a small number of collapsed cells with a spontaneous reinflation) No No No Dive or roll angle 15° to 45°
Line tension Small asymmetric collapse Change of course until re-inflation Maximum dive forward or roll angle Re-inflation behaviour Total change of course Collapse on the opposite side occurs Collapse on the opposite side occurs Folding lines used arge asymmetric collapse Change of course until re-inflation Maximum dive forward or roll angle Re-inflation behaviour Total change of course Collapse on the opposite side occurs	Most lines tight A Less than 90° Dive or roll angle 0° to 15° Spontaneous re-inflation Less than 360° No (or only a small number of collapsed cells with a spontaneous re inflation) No No No No No Dive or roll angle 15° to 45° Spontaneous re-inflation Less than 360° No (or only a small number of collapsed cells	Most lines tight A Less than 90° Dive or roll angle 0° to 15° Spontaneous re-inflation Less than 360° No (or only a small number of collapsed cells with a spontaneous reinflation) No No No Dive or roll angle 15° to 45° Spontaneous re-inflation Less than 360° No (or only a small number of collapsed cells with a spontaneous reinflation) No No Dive or roll angle 15° to 45° Spontaneous re-inflation Less than 360° No (or only a small number of
