## DHV TESTREPORT EN 926-2:2013+A1:2021

Manufacture	DHV GS-01-2836-23 <u>Skywalk GmbH &amp; Co. KG</u> <u>Skywalk GmbH &amp; Co. KG</u>	
Classification Winch towing	В	
Number of seats min / max Accelerator	1/1	
Trimmers	No	
		. A
		BEHAVIOUR AT MAX WEIGHT In Flight (105kg)
lest pliots		
		25
		Mario Eder No release
		A Smooth, easy and constant rising
Special take off technique required		No
Landing Special landing technique required		A No
<u>Speeds in straight flight</u>	Α	Α
Trim speed more than 30 km/h Speed range using the controls larger than 10		Yes Yes
km/h Minimum speed	Less than 25 km/h	Less than 25 km/h
<u>Control movement</u> Symmetric control pressure		<b>A</b> Increasing
Symmetric control travel	-	Greater than 65 cm
Pitch stability exiting accelerated flight Dive forward angle on exit		<b>A</b> Dive forward less than 30°
Collapse occurs		No
<u>Pitch stability operating controls during</u> accelerated flight	Α	Α
Collapse occurs		No
<u>Roll stability and damping</u> Oscillations		<b>A</b> Reducing
		A
Tendency to return to straight flight		Spontaneous exit
Behaviour exiting a fully developed spiral dive Initial response of glider (first 180°)	Immediate reduction of rate of turn	A Immediate reduction of rate of turn
		Spontaneous exit (g force decreasin rate of turn decreasing) Less than 720°, spontaneous recove
		A
Recovery	Spontaneous in less than 3 s	Rocking back less than 45° Spontaneous in less than 3 s
Dive forward angle on exit Change of course Cascade occurs	Keeping course	Dive forward 0° to 30° Keeping course No
Cascade occurs Folding lines used		No no
<u>Unaccelerated collapse (at least 50 % chord)</u> Entry		<b>A</b> Rocking back less than 45°
Recovery Dive forward angle on exit	Spontaneous in less than 3 s Dive forward 0° to 30°	Spontaneous in less than 3 s Dive forward 0° to 30°
Change of course Cascade occurs	Keeping course No	Keeping course No
Folding lines used Accelerated collapse (at least 50 % chord)		no
Entry	Rocking back less than 45°	Rocking back less than 45°
Recovery Dive forward angle on exit Change of course	Dive forward 0° to 30°	Spontaneous in less than 3 s Dive forward 0° to 30° Keeping course
Cascade occurs Folding lines used	No	No
<u>Exiting deep stall (parachutal stall)</u>	Α	Α
-	Spontaneous in less than 3 s	Yes Spontaneous in less than 3 s
-	Changing course less than 45°	Dive forward 0° to 30° Changing course less than 45°
Cascade occurs High angle of attack recovery		No <b>A</b>
	Spontaneous in less than 3 s	Spontaneous in less than 3 s No
		<b>A</b>
Dive forward angle on exit	Dive forward 0° to 30°	Dive forward 0° to 30° No collapse
Cascade occurs (other than collapses) Rocking back	No	No Less than 45°
		Most lines tight
Change of course until re-inflation	Less than 90°	A Less than 90°
Maximum dive forward or roll angle Re-inflation behaviour Total change of course	Spontaneous re-inflation	Dive or roll angle 0° to 15° Spontaneous re-inflation Less than 360°
Collapse on the opposite side occurs	No (or only a small number of collapsed cells with a spontaneous re inflation)	No (or only a small number of collapsed cells with a spontaneous re
Twist occurs Cascade occurs	No	inflation) No No
Folding lines used		no
Large asymmetric collapse Change of course until re-inflation		<b>B</b> 90° to 180°
Maximum dive forward or roll angle Re-inflation behaviour	Spontaneous re-inflation	Dive or roll angle 15° to 45° Spontaneous re-inflation
	No (or only a small number of collapsed cells	Less than 360° No (or only a small number of collapsed cells with a spontaneous r
Twist occurs	No	inflation) No
Cascade occurs Folding lines used		No no
	Α	
		<b>B</b>
Change of course until re-inflation Maximum dive forward or roll angle	Dive or roll angle 15° to 45°	90° to 180° Dive or roll angle 15° to 45°
Change of course until re-inflation Maximum dive forward or roll angle Re-inflation behaviour Total change of course	Dive or roll angle 15° to 45° Spontaneous re-inflation Less than 360° No (or only a small number of collapsed cells	90° to 180° Dive or roll angle 15° to 45° Spontaneous re-inflation Less than 360° No (or only a small number of
Change of course until re-inflation Maximum dive forward or roll angle Re-inflation behaviour Total change of course Collapse on the opposite side occurs	Dive or roll angle 15° to 45° Spontaneous re-inflation Less than 360° No (or only a small number of collapsed cells with a spontaneous re inflation)	90° to 180° Dive or roll angle 15° to 45° Spontaneous re-inflation Less than 360° No (or only a small number of collapsed cells with a spontaneous r inflation)
Change of course until re-inflation Maximum dive forward or roll angle Re-inflation behaviour Total change of course Collapse on the opposite side occurs	Dive or roll angle 15° to 45° Spontaneous re-inflation Less than 360° No (or only a small number of collapsed cells with a spontaneous re inflation) No No	90° to 180° Dive or roll angle 15° to 45° Spontaneous re-inflation Less than 360° No (or only a small number of collapsed cells with a spontaneous r
Change of course until re-inflation Maximum dive forward or roll angle Re-inflation behaviour Total change of course Collapse on the opposite side occurs Twist occurs Cascade occurs Folding lines used	Dive or roll angle 15° to 45° Spontaneous re-inflation Less than 360° No (or only a small number of collapsed cells with a spontaneous re inflation) No No	90° to 180° Dive or roll angle 15° to 45° Spontaneous re-inflation Less than 360° No (or only a small number of collapsed cells with a spontaneous re inflation) No
Change of course until re-inflation Maximum dive forward or roll angle Re-inflation behaviour Total change of course Collapse on the opposite side occurs Twist occurs Cascade occurs Folding lines used	Dive or roll angle 15° to 45° Spontaneous re-inflation Less than 360° No (or only a small number of collapsed cells with a spontaneous re inflation) No No No 90° to 180°	90° to 180° Dive or roll angle 15° to 45° Spontaneous re-inflation Less than 360° No (or only a small number of collapsed cells with a spontaneous re inflation) No No no
Change of course until re-inflation Maximum dive forward or roll angle Re-inflation behaviour Total change of course Collapse on the opposite side occurs Twist occurs Cascade occurs Folding lines used Large asymmetric collapse accelerated Change of course until re-inflation Maximum dive forward or roll angle Re-inflation behaviour Total change of course	Dive or roll angle 15° to 45° Spontaneous re-inflation Less than 360° No (or only a small number of collapsed cells with a spontaneous re inflation) No No No No no <b>B</b> 90° to 180° Dive or roll angle 15° to 45° Spontaneous re-inflation Less than 360°	90° to 180° Dive or roll angle 15° to 45° Spontaneous re-inflation Less than 360° No (or only a small number of collapsed cells with a spontaneous re inflation) No No No No No Dive or roll angle 15° to 45° Spontaneous re-inflation Less than 360°
Change of course until re-inflation Maximum dive forward or roll angle Re-inflation behaviour Total change of course Collapse on the opposite side occurs Twist occurs Cascade occurs Folding lines used Large asymmetric collapse accelerated Change of course until re-inflation Maximum dive forward or roll angle Re-inflation behaviour Total change of course Collapse on the opposite side occurs	Dive or roll angle 15° to 45° Spontaneous re-inflation Less than 360° No (or only a small number of collapsed cells with a spontaneous re inflation) No No No No No 90° to 180° Dive or roll angle 15° to 45° Spontaneous re-inflation Less than 360° No (or only a small number of collapsed cells with a spontaneous re inflation)	90° to 180° Dive or roll angle 15° to 45° Spontaneous re-inflation Less than 360° No (or only a small number of collapsed cells with a spontaneous r inflation) No No No No no <b>B</b> 90° to 180° Dive or roll angle 15° to 45° Spontaneous re-inflation Less than 360° No (or only a small number of
