HIGH-END SEAT HARNESS

SUCCESS 5

Safety & Comfort first

Once again, safety and comfort were given top priority for this 5th generation SUCCESS, a high quality seatboard harness.

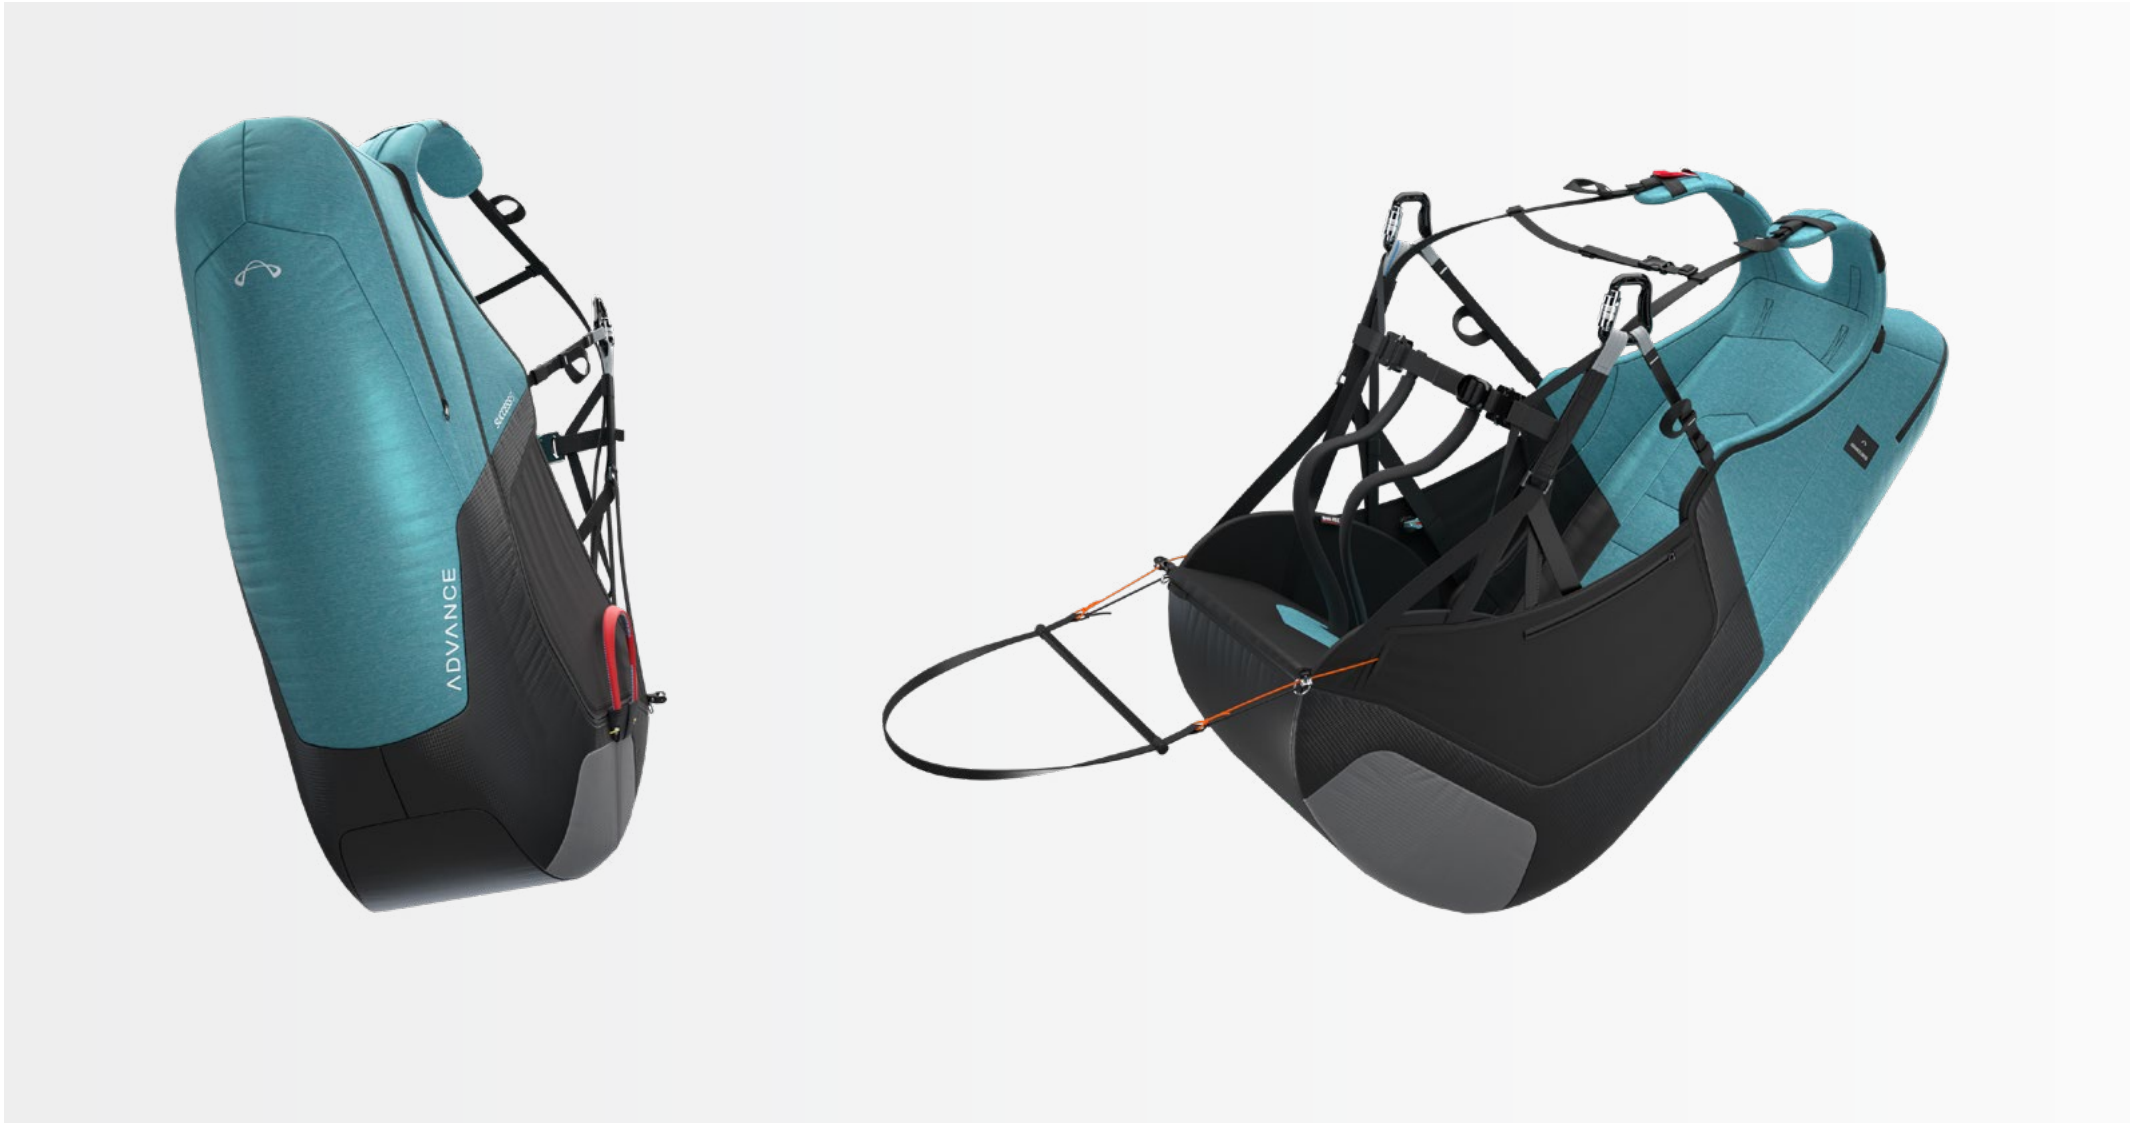

The SUCCESS 5 has an additional SAS-TEC element along its entire back. The main protector has been completely redeveloped and provides a 25% higher energy absorption factor – for 20% reduced packing volume. In addition, a Hook Knife is now supplied and is stored in a shoulder strap. The additional foam protector for lumbar and thoracic vertebrae is also built into this 5th generation SUCCESS. Naturally, well-proven features have been retained. These include ergonomically designed back support, with a 3D seat shell for maximum comfort, and the Balance-Strap-System for easy airborne entry and exit. A sporty, sleek design ensures a clean silhouette and the best possible aerodynamics.

Last but not least, the SUCCESS 5 has a completely new look, and provides the starting point for a new ADVANCE harness design line.

SUCCESS 5

New Look

ADVANCE

Pioneering spirit and Swiss precision
Our story

Enable our ideas to fly, that's what we do. For more than 30 years, ADVANCE have kept the needs and wishes of our pilots at the forefront. With Swiss precision we refine model after model. Highest quality and absolute reliability have our top priority, in the air and in our customer service. So from pioneers we have become perfectionists, and a leading worldwide comprehensive service provider.

SUCCESS 5

Safety & Comfort first

SAFE

COMFORTABLE

SPORTY

SUCCESS 5

Maximum Protection

EVEN MORE PROTECTION

An additional SAS-TEC element protects the entire back region of the SUCCESS 5 and complements the comfort foam. A foam protector, two additional foam sections and the lateral SAS-TEC elements protect the lumbar spine and also the thoracic vertebrae and pelvis.

SUCCESS 5

New Protector Technology

HIGHER DAMPING AND MORE COMPACT

The redeveloped multi-chamber foam protector provides a 25% higher energy absorption (31 G) for a 20% reduction in packed volume. It packs down significantly better, faster and more easily than before.

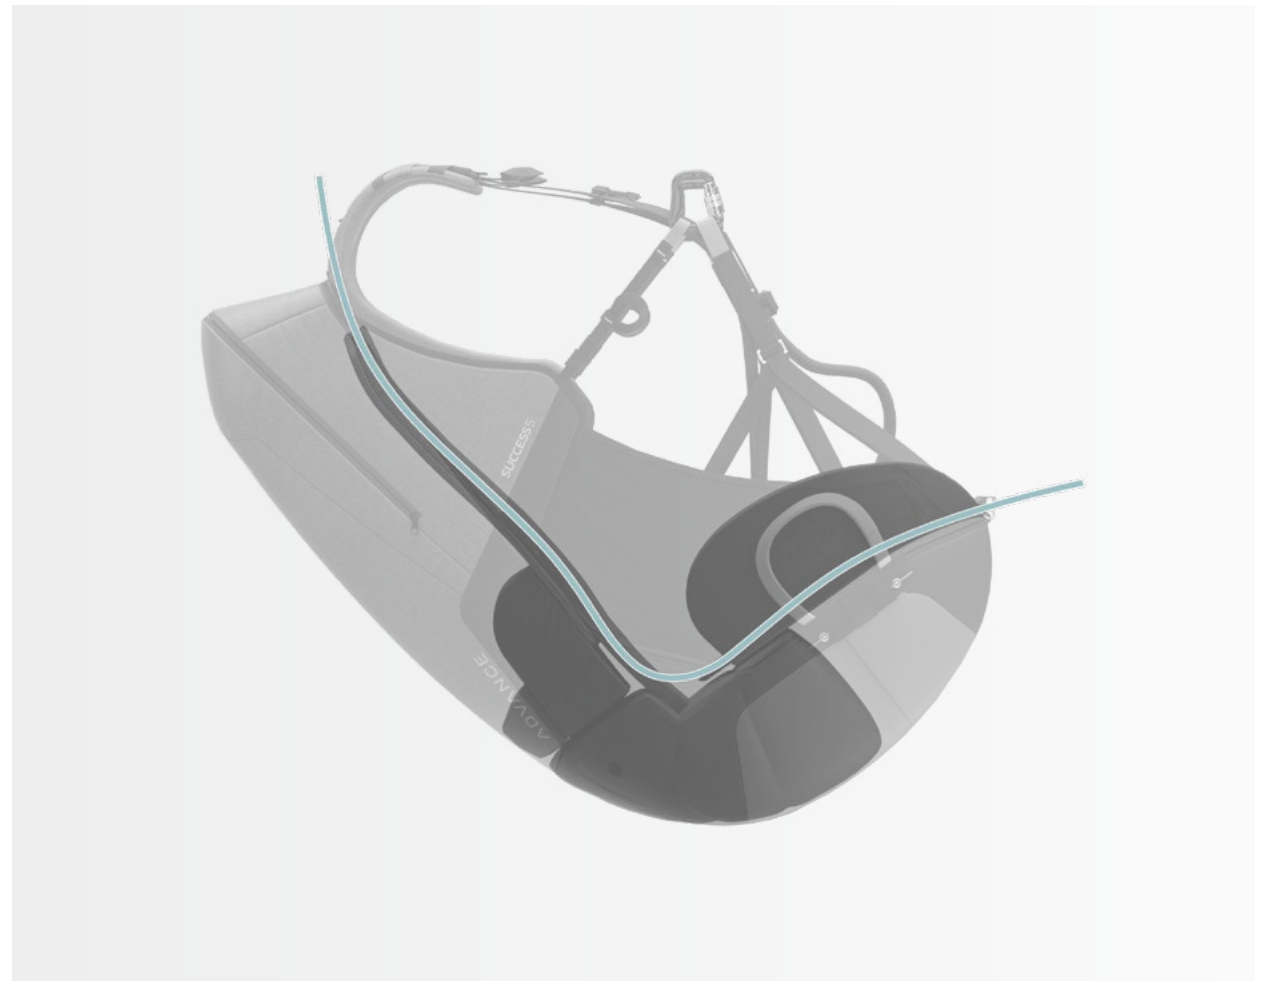

SUCCESS 5

High Comfort

PERFECT SUPPORT

The ergonomic 3D seatshell provides the SUCCESS 5 with the highest degree of comfort. In addition, protector, foam supports, comfort foam and SAS-TEC elements are so arranged that the entire length of the pilot's back is perfectly supported.

SUCCESS 5

ADVANCE Brandfaces

THE SUCCESS 5 REPRESENTS
THE STATE OF THE ART IN
SAFETY AND COMFORT.
THERE HAS NEVER BEEN
SUCH COMPREHENSIVE
PROTECTION IN SEAT
HARNESSES BEFORE.

SUCCESS 5

Balance-Strap-System

EASY TO SLIDE IN AND OUT

The Balance-Strap-System makes it easy to slide back into the harness after takeoff, and assume the upright body angle again before landing. As soon as the pilot pulls the knees in after takeoff he will automatically slide back into the harness, without help from the hands. If he stretch the legs out before landing and push the hips forward, he will automatically tip forward into the upright ground running attitude. This Balance-Strap-System enables the pilot to leave his hands on the brakes while near the ground: another safety plus.

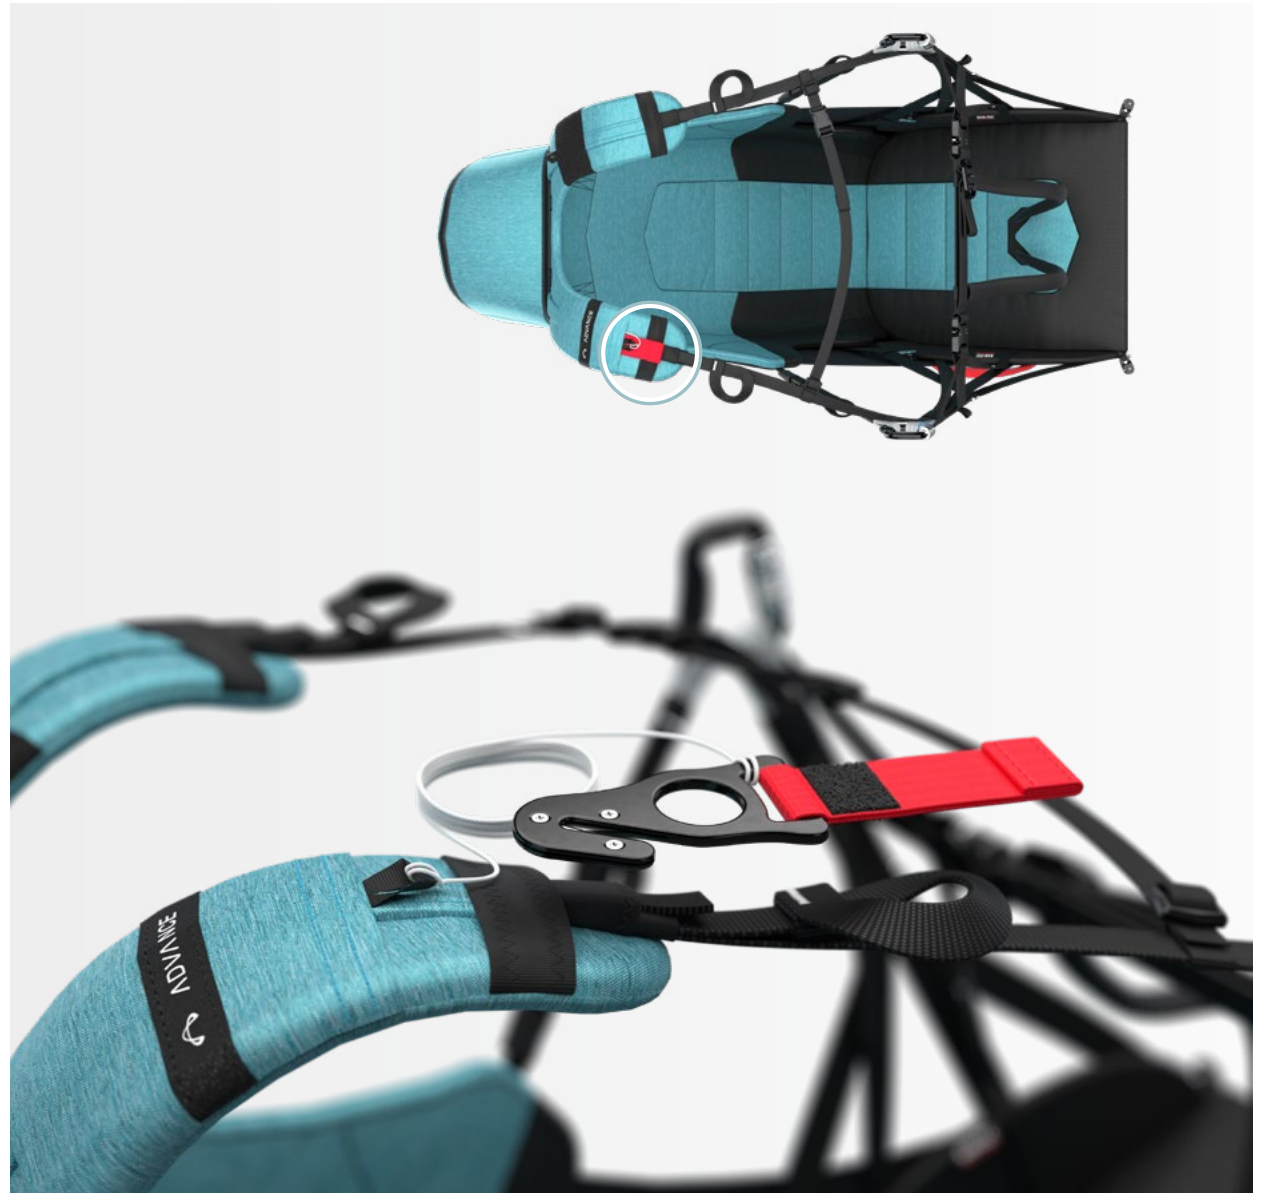

SUCCESS 5

Hook Knife

READY TO HAND IN AN EMERGENCY

The SUCCESS 5 is now provided with a high quality Hook Knife, stowed in a shoulder strap, is easy to see and secured by a line. It can be used in an emergency e.g. water landing, tree landing or freeing yourself from a reserve, in other words to quickly separate yourself from your equipment. The Hook Knife will cut through shoulder straps, front strap, lines, risers etc.

SUCCESS 5

Delivery Convenience

SPEED SYSTEM ALREADY INSTALLED

SUCCESS 5 delivery comes with a carbon speedbar system. The speed system runs through the harness via its easy-rolling Ronstan ball bearing pulleys, and is already installed at delivery.

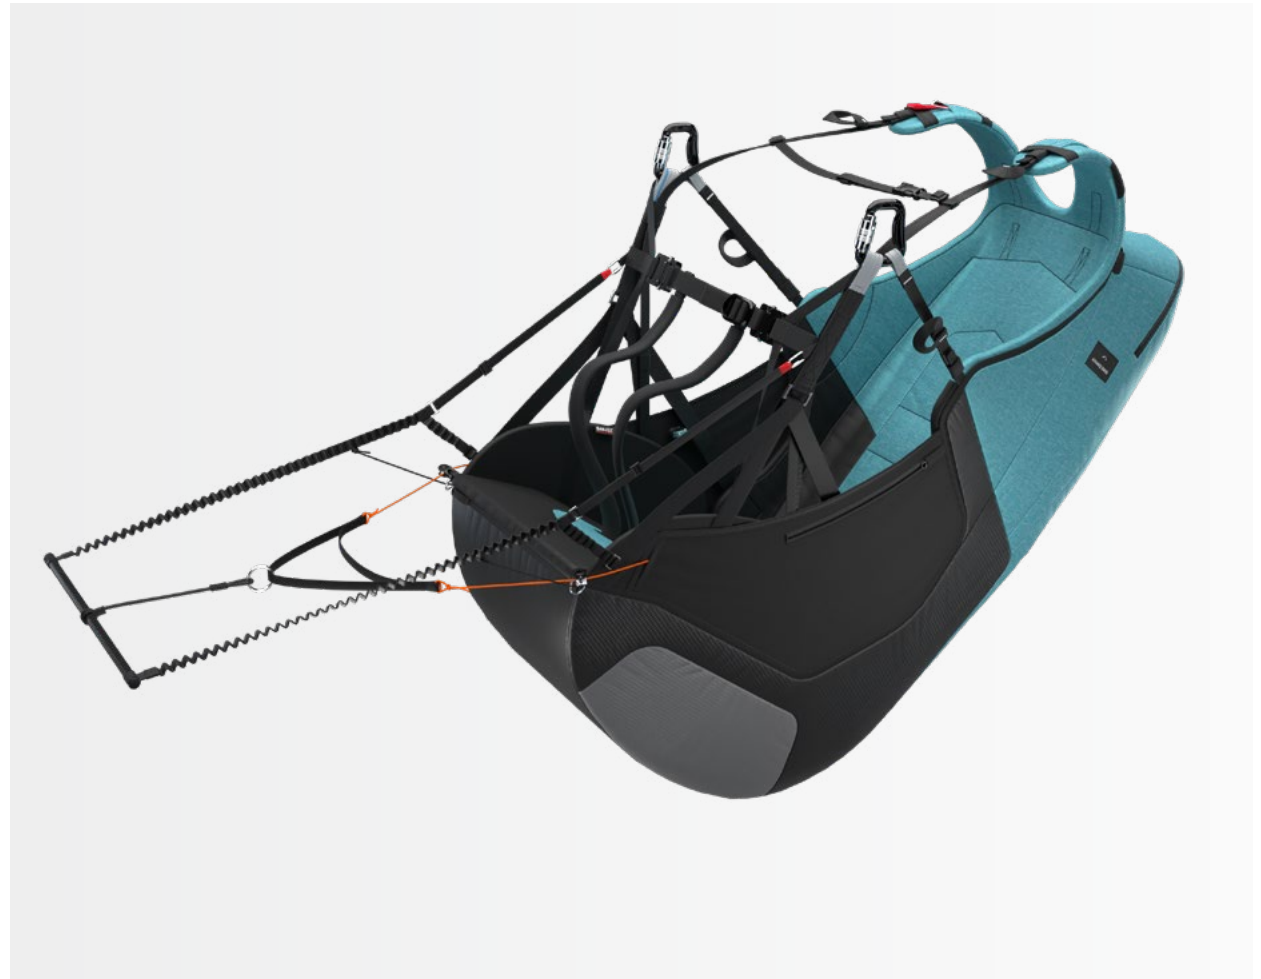

SUCCESS 5

Footrest compatible

OPTIONAL FOOTREST

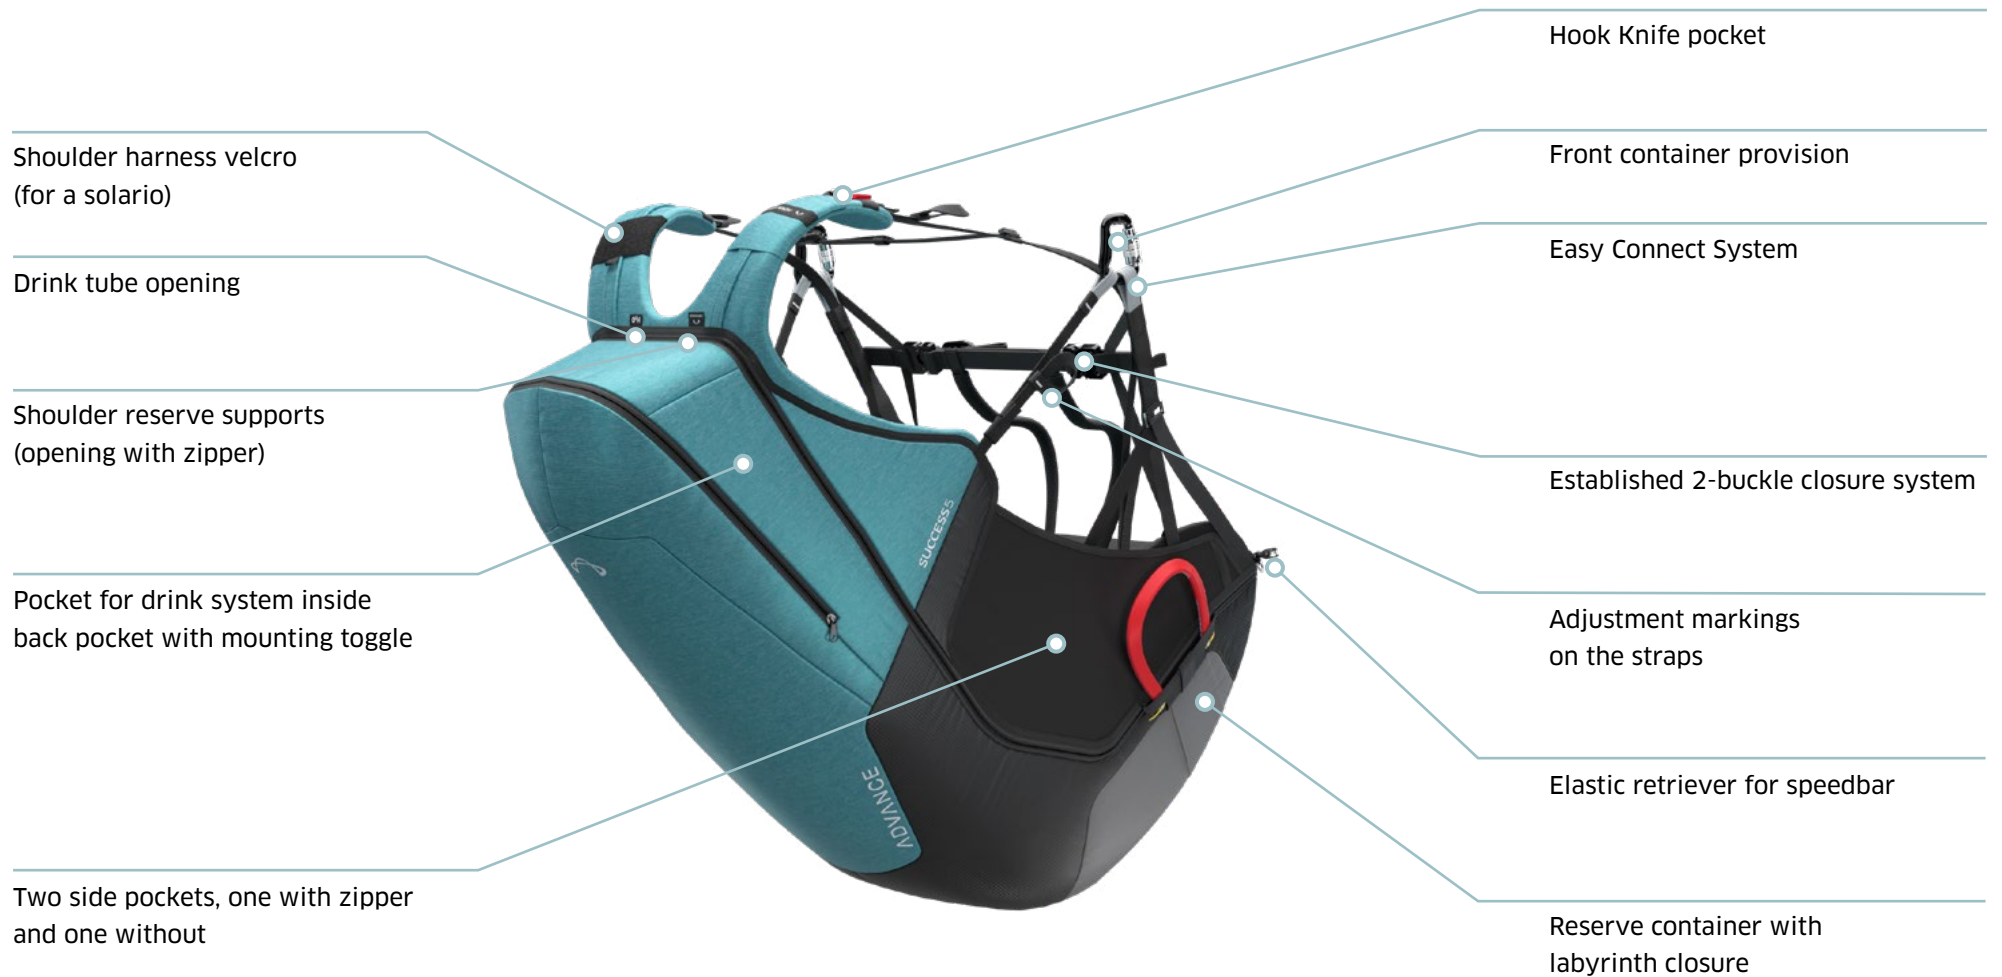

A SUCCESS 5 footrest/stirrup is available as an optional extra. The footrest is included in the harness certification, and comes with a speedbar tensioner cord.
